

## Plastic and Aesthetic Surgery

Plastic and Aesthetic surgery is becoming increasingly popular worldwide. Cosmetic surgery, once the preserve of the jet-setting rich, is now something more people than ever are prepared to consider.

Choosing to have plastic surgery is an important decision, and so is selecting a plastic surgeon. Whether you're considering cosmetic surgery to improve your appearance or reconstructive surgery to correct defects or improve function, you want a board-certified surgeon with the skill and training to help achieve your goals.

### Consultation in London; Surgery in Germany

The initial complimentary consultation will be in London in our Harley Street clinic. Mr Walgenbach will carefully examine you and discuss your surgical procedure with you in detail. He will be more than happy to answer all your questions.

The surgical procedures are carried out in Germany at the University of Bonn medical centre. The University Hospital is a modern, state of the art facility and internationally renowned for its surgical and medical expertise. It is considered as one of the top medical facilities in Germany and Europe. Furthermore he operates also at an exclusive private clinic close by, which is a state of the art facility and one of the finest in the EU.

After the hospital stay, hotel accommodation can be arranged in a variety of hotels, including a five star hotel resort within walking distance to the medical centre. The international Cologne/ Bonn airport, which is Europe's largest hub for low fare airlines, is 25 minutes away. Airport transfers can be provided.

Mr Walgenbach offers his patients very personal care, around and during the surgical procedure. He and his team will see patients on a daily basis, at all times during the recovery stage to assure that you feel comfortable and well.

### Your Surgeon

Mr Klaus Walgenbach is an internationally recognised and renowned Plastic and Aesthetic Surgeon. He was recently featured in ITV's "Supersize Surgery". He completed his training in Germany and the US and held a three year appointment as Professor at the University of Pittsburgh Medical Centre. He still serves there as an Associate Professor. Currently he holds a post as Consultant Plastic and Aesthetic Surgeon at the University of Bonn. He is extensively published in the scientific literature, is the author of chapters in plastic surgery textbooks and co-editor of a new textbook on breast surgery.

Mr. Walgenbach is one of Europe's leading figures in the highly competitive field of aesthetic and cosmetic surgery with extensive experience across the spectrum of cosmetic surgery, and especially in breast and body contouring surgery. A new evolving speciality is body contouring, following significant weight loss after gastric banding or bypass.

In addition to cosmetic surgery of the face, breast and body, he offers a wide range of facial rejuvenation and wrinkle treatments including Botulinum-toxin-injection (e.g. Botox® or Dysport®) and Fillers (e.g. hyaluronic acid). These treatments can be carried out at the Harley Street clinic or in Germany.
